MAY 28 1948
U.S PATENT OFFICE

THREE NEW MODELS
EQUIPPED WITH PATENTED
NEEDLE BEARINGS

T&S TORRINGTON

THE NEW W

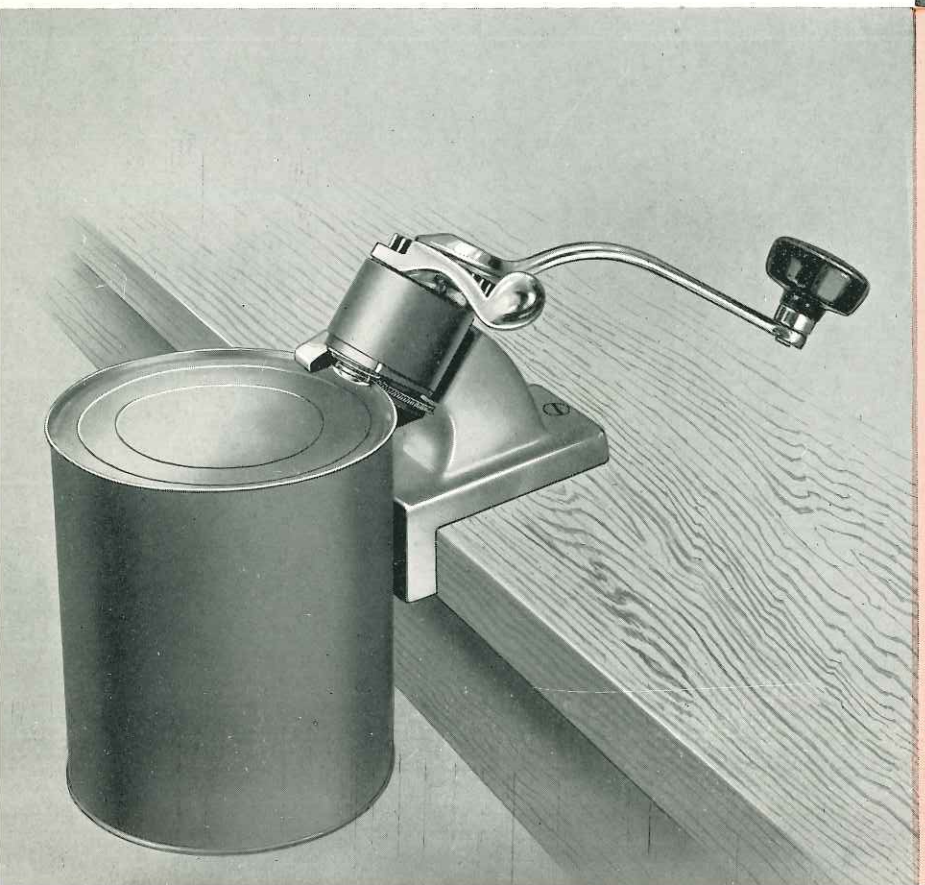
THESE CAN OPENERS OPERATE WITH "THE GREATEST OF EASE" - THANKS TO THE NEW

Needle Bearings

The Needle Bearing as illustrated is 2¼ times actual size. Virtually eliminates friction. Makes for easier operation; increases life of can opener.

THE WEST

MODEL 25 shown below opens cans up to Size 12, including sardine cans. Fastened to edge of table or bench by means of cast aluminum table bracket and three screws. Price $15.00 each.



By the use of Needle Bearings, an exclusive feature with these three models, friction is eliminated, and fast, finger-tip operation is assured. All models are equipped with four Needle Bearings—two on the cutter shaft and two on the drive wheel shaft.

The drive wheel on all models obtains its traction under the rim of the can and operates in co-ordination with the cutting wheel so that the top is cut off by a shearing operation which eliminates serrated edges and effectively prevents metal particles from falling into the can.

THE SUPER KAN MASTER

MODEL 35 shown below opens cans up to Size 12, including sardine cans. Formed-metal table plate holds can in place and it may be adjusted to the height of the can by sliding up or down on the sliding bar; which in turn is held in place by a cam action clamp. Kan Master fastened to table by thumb screw. Price $22.50 each.

The rotating knife does not come in contact with the food in the can. Cutting unit and drive wheel on all models are made of special high carbon tool steel.

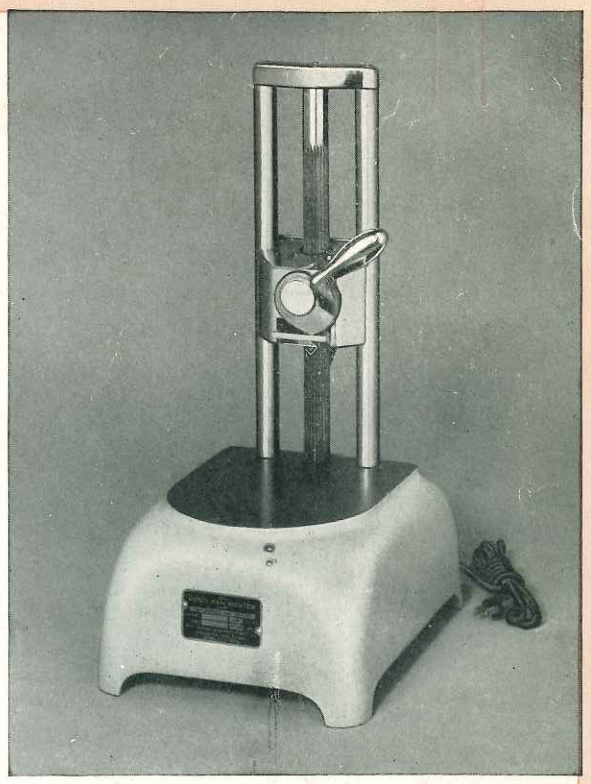
The Westco, West and Super Kan Master all have the same cutting unit, but different bracket attachments.

THE WESTCO

MODEL 15 shown above opens cans up to and including Size 10, including sardine cans. Base and upright of cast aluminum. Price $15.00 each.

YMOUR MFG. CO.
ON, CONN.

Moto Kan Master



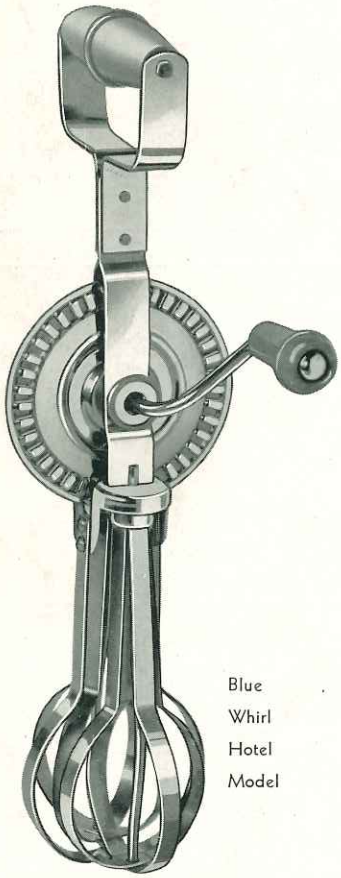
This newly designed, modern, power-operated can opener is ideal for use wherever large numbers of cans must be opened quickly and with a minimum of effort.

The can is placed on round platform with edge of can resting against knurled upright in center. Cutting unit is raised or lowered to proper operating level by pushing lever to left. To start motor, push lever to the right as far as possible. To stop motor, return lever to neutral position, as shown in illustration.

DISCONTINUED

Moto Kan Master — equipped with universal type 110 volt AC-DC motor — will open any style or size can up to No. 12.

OTHER TURNER & SEYMOUR KITCHEN TOOLS



Blue Whirl Hotel Model

Herewith are two more of Turner & Seymour's complete line of kitchen tools. Blue Whirl Ball Bearing Beater has moulded handle and knob, full ball bearing drive, large gear wheel and gear shield. Stationery blades, floats and pivot brace are made of stainless steel.

Left to right: Mixing spoon, Draining spoon and Basting spoon. All spoons are made of stainless steel and may be obtained in two lengths, either 11″ or 13″. A well shaped bowl and the position of our well proportioned handle make it possible to use these spoons to full capacity with less danger of burning the user.
